Overview

Catering to the Customer

Our team of Engineers, Project Managers and Technicians will see that your project is installed on-time, in budget and according to the standards.

FuTech Systems works with each individual client to design the systems that meets their needs and objectives provides the most cost effective solutions for their application.

“Am I paying for more than I need or getting less than is required?” With the range of systems available on the market today from the Cadillac on down it can often become confusing to the customer. Today’s technology is changing at a rapid pace in areas that haven't seen much change in the past twenty years.

FuTech Systems is able deliver, install and maintain a custom design Integrated or stand alone Low Voltage Solutions ([Here Listed](#)) meets client specific need, applications and budget.

Business Applications:-

1. Enterprise Asset Management

IBM Maximo for:-

- ✓ Asset & Service Management System (CMMS)
- ✓ Asset Tracking System
 - Asset Labeling
 - Asset Capturing Services

2. Engineering Solutions

Bentley CAD Application for:-

- ✓ Building
- ✓ Plant
- ✓ Civil
- ✓ Geo Spatial
- ✓ Spans Architectural
- ✓ Constructions (AEC) & Operations.

Smart Building Solutions

1. Security Systems

- ✓ CCTV
- ✓ Access Control System
- ✓ Identification System (ID)
- ✓ Intrusion Detection & Alarming System

2. Voice Communication systems

- ✓ Nurse Call
- ✓ Telephony Solutions
- ✓ Intercom System
- ✓ Public Address System
- ✓ Sound Engineering
- ✓ Sound Masking

3. Data Communication systems

- ✓ LAN Infrastructure Cabling (Copper / Fiber)
- ✓ LAN Passive Component
 - Cabinet
 - Patch Panels
- Face Plates
- ✓ Cable Labeling
- ✓ Cable Management

4. Master Clock Systems

- ✓ Analogue Clock System
- ✓ Digital Clock System
- ✓ GPS Clock System

5. Boardroom Presentation & Control Systems

- ✓ Video / Data Projection System
- ✓ Audio/Video Conference System
- ✓ Audio/Video Control System
- ✓ Light Dimming System

6. SATV/MATV

- ✓ Analogue Clock System
- ✓ Digital Clock System
- ✓ GPS Clock System

7. Fire Detection & Protection Systems

- ✓ Analog Fire Alarm Systems
- ✓ Central Monitoring
- ✓ Conventional Fire Alarm Systems
- ✓ Design/Build
- ✓ Intelligent Fire Alarm Systems
- ✓ Stand-alone Device

8. Standby Power Sources

- ✓ Un-interrupted Power Supply (UPS)
- ✓ Standby Generators
- ✓ DC/AC Battery Chargers & Switching Power Supply
- ✓ Automatic Transfer Switches

Complete Design Services (DS)

Our design & engineering department has over 85 Projects experience in the low voltage systems industry. To make our solutions more competitive we offer free design build and value engineering services.

End to End Project Management (PM)

Each project is assigned to a dedicated Project Manager to see the job through from submittals to as-built and to work with your field personnel to make sure the systems go in smooth.

Our detail oriented project documentation keeps your field personnel from wasting valuable time. Each project is provided with:

- ✓ Submittals
- ✓ CAD Drawings
- ✓ One Line Diagrams
- ✓ Custom Installation Manuals
- ✓ Testing Acceptance Assistance
- ✓ As-Built Drawing
- ✓ On-Site Support

Quality Support (QS)

Our technicians and project managers are certified on the products they install and our installations are backed by a 12 month parts and labor warranty.

Preventive Maintenance Programs (PMP)

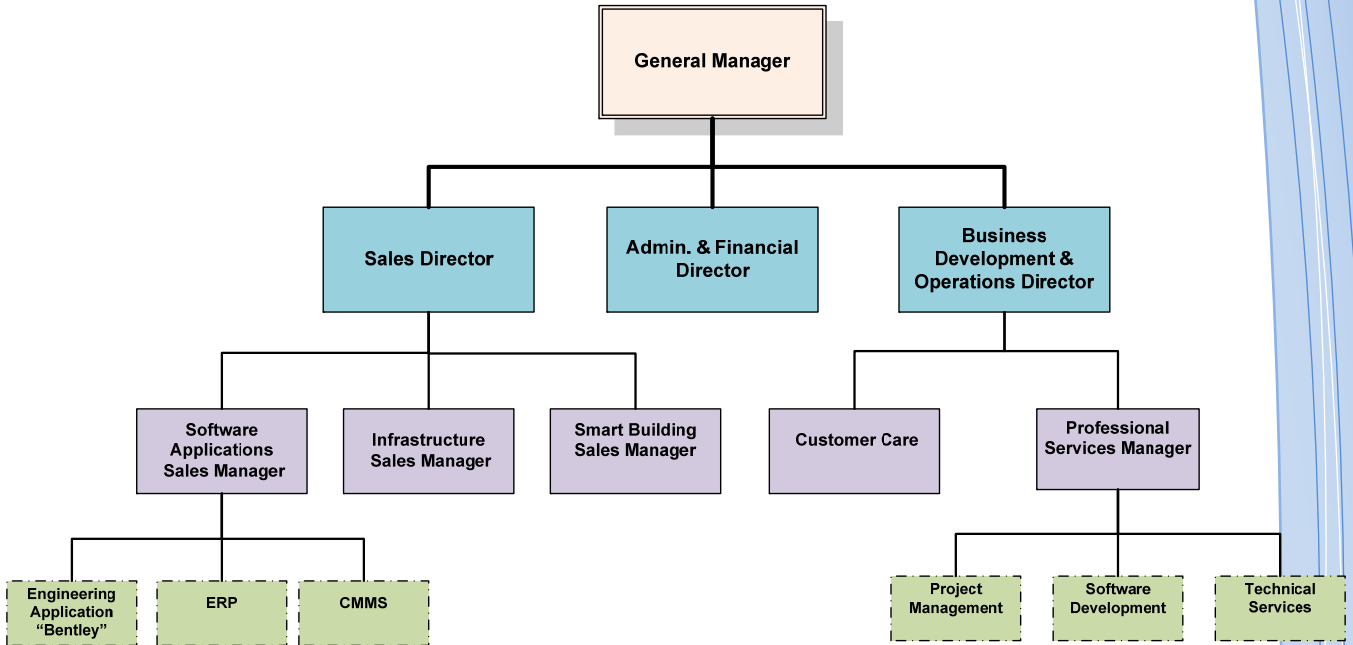

FuTech Systems develop a preventive maintenance program that provides you with a single source of required services for all of your low voltage systems life. A service representative will meet with you, tour your facility, and develop a service agreement to ensure your systems are tested, inspected and maintained to keep them operating a peak performance. Your agreement may include inspections, testing, parts replacement, emergency services, repair, maintenance or other services we provide.

On – call Maintenance & Support (CM)

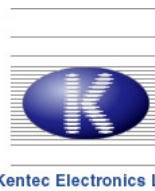

Operating a business can be a time consumes and at **FuTech Systems** we understand that your time is valuable. That is why we let you concentrate on the most important thing - your business. **FuTech Systems** will provide your company with dedicated sales and technician Support whenever needed. We offer the complete servicing package that will ensure the longevity of your AV systems for years to come.

Customer References

1. Egyptian Fertilizers Company (EFC)

Location: Red Sea, Suez, Ain Sokhna

Contact Person: Eng. Medhat Abdel Aal (+2012 2201498)

Scope Of Work: Turn Key project for Supply & Implement Maximo CMMS Application includes Professional Services and Data Engineering Services

2. Egypt Basic Industries Corporation (EBIC)

Location: Red Sea, Suez, Ain Sokhna

Contact Person: Eng. Walid Fathi (+2017 3660301)

Scope Of Work: Turn Key project for Supply & Implement Maximo CMMS Application includes Professional Services and Data Engineering Services.

Turn Key Project for Supply & Implement Bentley Engineering Doc. Management System (EDMS) includes Integration Gateway to Maximo CMMS.

3. Khalda Petroleum Company (KPC)

Location: Western Desert

Contact Person: Eng. Ahmed Yassen (+2010 0061142)

Scope Of Work: Turn Key project for Supply & Implement Maximo CMMS Application includes Professional Services and Data Engineering Services.

4. Pharonic Petroleum Company (PhPc)

Location: Port Said

Contact Person: Eng. Mohamed El Saghir (+971 50 4369404)

Scope Of Work: Maximo Data Cleansing, Re-engineering, Location / Asset Criticality Assessment, Asset Classification & Technical Specification Data Gathering.

5. Lafarge Cement

Location: Saudi Arabia - Jeddah

Contact Person: Eng. Ahmed Emam (+2012 3926571)

Scope Of Work: Maximo Training Services, Implementation Technical Support Services

About FuTech - Systems

FuTech - Systems is a privately held of end—to end comprehensive Low Voltage solutions for the infrastructure lifecycle. We believe in the vital role that infrastructure must play both in sustaining society and in sustaining the environment. **FuTech - Systems** Provides proven Solutions & Services that help engineers, architects, contractors, governments, institutions, utilities and owner-operators design, build, operate & maintain more productively, collaborate more globally and deliver infrastructure assets that perform more sustainably
